

BUSINESS CANNONS 2008 EDITION 0001

NEW WAYS OF DOING BUSINESS

If your business is fine doing what it is doing and getting what it is getting, don't read this now, however you may want to tune in later! If your business would like to increase income, why not build a relationship with a client willing to buy what your business provides without being concerned about your prices?

If you want your business to be more profitable, why not eliminate costs of purchases?

If your company would like to expand, fund a project or simply increase capital, why not obtain capital - with no payment or repayment in cash required?

If you have an idea that could make the world a better place, why not plug into a business system that can enable you to create a future - the way that you want it to be?

Although you may certainly use money to "plug-in" to this system, money is not necessary and you may achieve even the highest of economic business goals by simply applying work!

Through other editions of BUSINESS CANNONS you may explore all of these concepts and more. If you are reading this, someone has already sponsored your business, institution, organization, or you, as a Member of the BUSINESS CANNONS CLUB.

This Membership entitles you to access and to do business through:

www.businesscannons.com

www.businesscannons.org

www.businesscannons.net

www.businesscannons.biz

www.businesscannons.info
